mapping the news

presidentialwatch08.com

map of the 292 influential sites making
the debate on the presidential race.
See how the different political communities are
represented on the Internet. Identify the true opinion hubs
and shapers in the debate.

nytimes.com

a visualization of the political debates in the U.S. elections.
each line represents a reference from one candidate to
another, while the length of each circle segment represents
the total words spoken by each candidate
during the debates.

news.google.com

The New York Times offers geo-coded news,
and Google Earth offers the platform for reading
that news in a 3D browser.
The Prometheus Radio Project map tool allows users to locate FM and L PFM stations and translators in their community.
